## NEW RECORDS ON LEPIDOPTERA (INSECTA) OF NAKHODKIN YAR GULCH (LUHANSK REGION, UKRAINE)

Дем'яненко, С. О. Нові знахідки лускокрилих (Insecta: Lepidoptera) в балці Находкін Яр (Луганська область, Україна). *Вісні Харківського ентомологічного товариства*. 2022. Т. XXX, вип. 1–2. С. 18–24. DOI: 10.36016/KhESG-2022-30-1-2-4.

Наведено список нових знахідок лускокрилих у балці Находкін Яр. Список містить 211 нових для балки Находкін Яр видів, з яких два види (*Ypsolopha trichonella* (Mann, 1861) і *Heliothela wulfeniana* (Scopoli, 1763)) уперше вказані для території Луганської області. Загалом у балці Находкін Яр відмічено 364 види Lepidoptera.

2 рис., 2 таб., 14 назв.

**Ключові слова:** Lepidoptera, лускокрилі, фауна, степ, балка Находкін Яр, Луганська область.

Demyanenko, S. O. New records of Lepidoptera (Insecta) of Nakhodkin Yar gulch (Luhansk Region, Ukraine). *The Kharkov Entomological Society Gazette*. 2022. Vol. XXX, iss. 1–2. P. 18–24. DOI: 10.36016/KhESG-2022-30-1-2-4.

A list of new records of the butterflies and moths in Nakhodkin Yar gulch is provided. The list includes 211 species registered in Nakhodkin Yar gulch for the first time, of which two species (*Ypsolopha trichonella* (Mann, 1861) and *Heliothela wulfeniana* (Scopoli, 1763)) are firstly recorded for Luhansk Region. Totally, there are 364 species of Lepidoptera registered in Nakhodkin Yar gulch. 2 figs, 2 tabs, 14 refs.

**Keywords:** Lepidoptera, butterflies and moths, fauna, steppe, gulch Nakhodkin Yar, Luhansk Region.

Дем'яненко, С. А. Новые находки чешуекрылых (Insecta: Lepidoptera) в балке Находкин Яр (Луганская область, Украина). *Известия Харьковского энтомологического общества*. 2022. Т. XXX, вып. 1–2. С. 18–24. DOI: DOI: 10.36016/KhESG-2022-30-1-2-4.

Приводится список новых находок чешуекрылых в балке Находкин Яр. Список включает в себя 211 новых для балки Находкин Яр видов, из которых два вида (*Ypsolopha trichonella* (Mann, 1861) и *Heliothela wulfeniana* (Scopoli, 1763)) впервые указаны для Луганской области. Всего в балке Находкин Яр отмечены 364 вида Lepidoptera.

2 рис., 2 таб., 14 назв.

**Ключевые слова:** Lepidoptera, чешуекрылые, фауна, степь, балка Находкин Яр, Луганская область.

**Introduction.** Nakhodkin Yar is a steppe gulch with chalk outcrops and ravine forest, located in SW surroundings of Novoaidar area of Luhansk Region (48.94 N, 38.93–98 E). The eastern part of the gulch is a local-rank nature landmark ‘Baranyachi Loby’ (Sheep’s Brows) (Kalinin and Gurskiy, 2011). Previously data on Lepidoptera of Nakhodkin Yar appeared in the publications shown in Table 1 (in some publications this place is indicated as ‘Novoaidar’). Totally, 153 species of Lepidoptera from Nakhodkin Yar were known prior to this work.

**Materials and methods.** This paper is based on the material from the eastern part of Nakhodkin Yar gulch. The material was observed, photographed, and collected by netting during short daytime excursions (2009–2013, 2021), and also by attracting by light of 250 W mercury-vapor lamps on 13.07.2012 (by Demyanenko S. O., Zhakov O. V., and Mushinskiy V. G.) and 25.08.2012 (by Demyanenko S. O. and Glotov S. V.).

Demyanenko S. O. Severodonetsk, Luhansk Region, 93400, UKRAINE; e-mail: severlepsd@gmail.com; ORCID: 0000-0002-7915-2546

Received 01.10.2022

Accepted 02.11.2022 by Dr. I. P. Lezhenina

Published 29.12.2022

Identification of the material was carried out by the authors. Identification by photographs was made only for species with distinct differences in habitus. In difficult cases, identification was made by genitalia prepared by maceration in 8–12% NaOH solution. Identification of mines were made by Ellis (2022) and Lepiforum (2022). Plant names are given by ‘Plants of the World Online’ (POWO, 2022).

The material collected by O. Zhakov and V. Mushinskiy is stored in their research collections, Microlepidoptera are in the collection of the Institute for Evolutionary Ecology of the National Academy of Sciences of Ukraine (Kyiv).

**Results.** In Table 2 below, all species are new for Nakhodkin Yar, an asterisk (\*) indicates a species new for Luhansk Region. The higher system of Lepidoptera follows Nieukerken *et al.* (2011).

**Table 2. New species of Lepidoptera of Nakhodkin Yar gulch**

Taxon	By light		Daytime data
	13.07.2012	25.07.2012	
<b>Family HEPIALIDAE Stephens, 1829</b>			
<i>Triodia sylvina</i> (Linnaeus, 1761)		common	
<b>Family NEPTICULIDAE Stainton, 1854</b>			
<i>Stigmella basiguttella</i> (Heinemann, 1862)			31.10.2021 — 3 mines on fallen leaves of <i>Quercus</i>
<b>Family ADELIDAE Bruand, 1850</b>			
<i>Nematopogon swammerdamella</i> (Linnaeus, 1758)			10.05.2013 — 1 sp.
<b>Family TISCHERIIDAE Spuler, 1898</b>			
<i>Tischeria ekebladella</i> (Bjerkander, 1795)			31.10.2021 — 1 mine on fallen leaves of <i>Quercus</i>
<b>Family TINEIDAE Latreille, 1810</b>			
<i>Neurothaumasia ankerella</i> (Mann, 1867)	1 sp.		
<b>Family PLUTELLIDAE Guenée, 1845</b>			
<i>Plutella xylostella</i> (Linnaeus, 1758)			31.05.2009, 10.05.2013, 06.06.2013 — 1–10 sp. per day
<b>Family YPSOLOPHIDAE Guenée, 1845</b>			
<i>Ypsolopha horridella</i> (Treitschke, 1835)	1 sp.		
* <i>Ypsolopha trichonella</i> (Mann, 1861) (Fig. 1)		2 sp.	
<b>Family ALUCITIDAE Leach, 1815</b>			
<i>Alucita grammadactyla</i> Zeller, 1841	1 sp.	1 sp.	
<b>Family EPERMENIIDAE Spuler, 1910</b>			
<i>Ochromolopis zugulajevi</i> Budashkin et Satchkov, 1991		1 sp.	
<b>Family OECOPHORIDAE Bruand, 1850</b>			
<i>Pleurota pyropella</i> ([Denis et Schiffermüller], 1775)			11.05.2013 — 1 sp.
<i>Holoscolia huebneri</i> Koçak, 1980			11.06.2009 — common
<b>Family DEPRESSARIIDAE Meyrick, 1883</b>			
<i>Ethmia candidella</i> (Alphéraly, 1908)		1 sp.	
<i>Ethmia bipunctella</i> (Fabricius, 1775)		4 sp.	
<b>Family COSMOPTERIGIDAE Heinemann, 1876</b>			
<i>Pancalia leuwenhoeckella</i> (Linnaeus, 1761)			14.06.2011 — 1 sp.
<i>Pancalia nodosella</i> (Bruand, 1850)			11.05.2009 — 1 ♀
<i>Pyroderces argyrogrammos</i> (Zeller, 1847)		2 sp.	
<i>Eteobalea anonymella</i> (Riedl, 1965)	1 sp.		
<b>Family GELECHIIDAE Stainton, 1854</b>			
<i>Aristotelia subericinella</i> (Duponchel, [1843])		1 sp.	
<i>Dichomeris limosellus</i> (Schläger, 1849)	1 sp.		
<b>Family LIMACODIDAE Duponchel, 1845</b>			
<i>Apoda limacodes</i> (Hufnagel, 1766)	2 sp.		
<b>Family ZYGAENIDAE Latreille, 1809</b>			
<i>Zygaena ephialtes</i> (Linnaeus, 1767)			10.07.2011 — 1 sp., f. <i>trigonellae</i>
<b>Family COSSIDAE Leach, 1815</b>			
<i>Dyspessa salicicola</i> (Eversmann, 1848)			11.06.2009 — 7 sp., 14.06.2011 — 2 sp., all on stems of <i>Allium</i>
<i>Zeuzera pyrina</i> (Linnaeus, 1761)	1 sp.		
<b>Family PYRALIDAE Latreille, 1809</b>			
<i>Synaphe moldavica</i> (Esper, 1794)			14.06.2011 — common
<i>Pyralis regalis</i> ([Denis et Schiffermüller], 1775)	1 sp.	1 sp.	
<i>Aphomia sociella</i> (Linnaeus, 1758)	1 sp.		
<i>Galleria mellonella</i> (Linnaeus, 1758)	1 sp.		
<i>Elegia similella</i> (Zincken, 1818)	1 sp.		
<i>Selagia spadicella</i> (Hübner, 1796)			30.07.2011 — 1 sp.
<i>Etiella zinckenella</i> (Treitschke, 1832)	4 sp.

Figs. 1–2. Species of Lepidoptera new for Nakhodkin Yar gulch and Luhansk Region: 1 — *Ypsolopha trichonella*, 25.07.2012; 2 — *Heliothela wulfeniana*, 31.05.2009.

**Conclusions.** According to the results of our research and the literature data, 364 species of Lepidoptera are found in Nakhodkin Yar gulch, 211 of which are given for the first time, and two of which are new for Luhansk Region. Regular attracting by light will definitely increase the number of species at this location.

**Acknowledgements.** The author are sincerely grateful to Yu. Geryak (Lviv Department of the Ukrainian Entomological Society, Sambir, Ukraine), S. Glotov (State Museum of Natural History, Lviv, Ukraine), O. Zhakov (Zaporizhzhya Regional Center of Tourism and Local History, Sports and Excursion for Studying Youth, Zaporizhzhia, Ukraine), and V. Mushinskiy (Zaporizhzhia, Ukraine) for cooperation in joint field expeditions, and to E. Karolinskiy (V. N. Karazin Kharkiv National University, Kharkiv, Ukraine) for revision of English text and useful comments.
